México.

QUALIFICATION

- UNIVERSIDAD AUTONOMA CHAPINGO, CHAPINGO, MEXICO
- (1982 - 1987)
- (1988 - 1993)
- AGRICULTURAL ENGINEER

VISION

To be a multidisciplinary firm made up of professionals specialized in drafting topographic and agronomic expert reports, committed to perform topographic surveys on polygons, fusion, division of the same, appraisals, estimates of harvest volumes, consultancy and technical assistance on agricultural and fruit production systems, as well as marketing of production.

MISSION

We are a technical-agronomic firm committed to providing technical certainty on dimensions, location of properties and their potential land use, environmental impact studies for the development of infrastructure, cost estimates and values of agricultural production.

SCOPE OF ACTIVITIES

We provide technical elements of analysis aimed at supplying technical certainty to our customers to site their properties.

Topics we are specialized in:

- Interpretation of documents referring to the basic records in ejido, communal, subdivided and human settlement land, as well as public deeds, ownership titles and purchase and sale agreements, among others
- Interpretation of documents related to the certification program of ejido rights and land titling (PROCEDE). As well as the information contained in the Register System and History of Agrarian Nuclei (PHINA)
- Georeferenced survey of properties through the use of current technology, and
- Geographic location of the properties in the cartography issued by INEGI (National Institute of Statistics and Geography) and its correlation with the computerized programs Google-Maps, Google Earth, which allow us to offer a better illustration and interpretation of the situations analyzed and correlate them with the documents that support the ownership or possession of property
